

Student Management System Report

Project Title

Student Management System

Objective

The objective of this project was to develop a Python-based system for managing student records.

Description

The application allows users to add, view, and delete student records. Student information is stored in JSON format for persistent storage.

Technologies Used

- Python 3
- JSON Module

Features

- Add Student Records
- View Student Records
- Delete Student Records
- JSON Data Storage
- Menu-Driven Interface

Program Workflow

1. User selects an option from the menu.
2. Student information is entered.
3. Data is stored in a JSON file.
4. Records can be viewed or deleted.

Output

The application successfully manages student information and stores data in a structured format.

Screenshots

- Adding Student Records
- Viewing Student Records
- JSON File Storage

Conclusion

The project successfully demonstrates data handling, file storage, and CRUD operations using Python and JSON
